

## SinoBiological Inc.

Established in 2007, Sino Biological is a global biotechnology company manufacturing high quality research reagents for basic, translational, and clinical research. Sino Biological laboratories consist of over 80,000 square meters, producing cDNAs, recombinant proteins, antibodies and antibody-based kits that are used to study cellular function and human diseases.

Sino Biological scientists are experienced in recombinant protein expression and purification from bacterial, yeast, insect and mammalian system. The scientists have also developed technologies to produce and purify a comprehensive collection of mouse monoclonal antibodies, rabbit polyclonal antibodies, and rabbit monoclonal antibodies. Sino Biological offers integrated service from gene cloning to protein expression, protein purification, and immunization for polyclonal or monoclonal antibody generation. We have provided CRO services to produce targets proteins, antibodies, and optimized ELISA tools to meet the needs of the biopharmaceutical industry, including the top 10 pharmaceutical companies.

Sino Biological product sales are supported through a network of distributors in North American, European and Asian markets. We are proud that our products are helping scientists to solve significant problems in life science research. Every product has to pass rigorous QC test standards to ensure consistent high quality. We validate our product application and guarantee its performance as specified. We are developing tools and technologies to provide the global scientific community with the best-in-class product to accelerate scientific discovery and innovation.

---

## Advantages

### Best Monoclonal Antibody Tools Worldwide

- Maximum 200-Fold Enhanced ELISA sensitivity
- 5 pg-level Antigen Detection Limit in Western Blot
- Leading 2nd Generation Rabbit mAb Technology
- No Products From Origin Entrusted Manufacturer

### Centralized Protein & Antibody Expression Lab Worldwide

- 60+ Highly Centralized Cell Culture Bioreactors
- 7000+ Protein Bulks in Stock
- 2000+ New Products Released Per Year
- 30-100 Grams Custom-Tailored mAb Production in Weeks

### Leading Pre-Clinical CRO for Biologics Worldwide

- One-stop Service from Discovery to Production
- Record Speed from DNA to Purified mAbs
- Serving Top-10 global Pharmaceutical/Biotech Companies

## Protein

All produced in house  
80% expressed with mammalian cell  
over 5,000 proteins, all in BULK quantities  
800-1,000 protein production per year  
Purity: Majority > 95% purity, some > 99%  
Big discount for bulk order

## Gene/cDNA clone

12,000+ cDNA clones, sequence confirmed  
Multiple tags for choice: His, Myc, Flag, HA, GFP and OPF  
Optimized for protein expression  
Human, mouse, rat, monkey, dog, virus cDNA available

## Hot Research Tools

Transfection Reagent  
Antibody Purification  
Protein A/G/L Resins  
Protein A/G/L  
Anti-DYKDDDDK Affinity Resin  
Neuraminidase(NA)  
Protease  
Nuclease  
Tag Antibody  
Secondary Antibody  
Control Antibody  
Loading Control  
Magnetic Beads Immunoprecipitation (IP) Kit  
Protein A/G/L IP Kit  
Tag Antibody IP Kit  
Primary Antibody IP Kit  
Magnetic Separator  
Synthetic Peptide for Elution

## Antibody

over 7,000 rabbit/mouse mAbs & rabbit Pabs  
Most generated against Full-Length proteins  
2nd generation of rabbit mAbs  
8-156 fold improvement in ELISA detection limit

## ELISA Kit

All Produced in House  
The detection limit is as low as 3.1 pg/ml  
>300 antibody pairs available

## Cell Lysate

# CRO Service

Advanced Technology & Experienced Production Engineers at Your Service

## 1 Antibody Production Services

### Recombinant antibody services

High-Throughput Recombinant Antibody Production Services

Mini scale (0.1-1 mg) antibody production  
Small scale (1-10 mg) antibody production  
Mid-scale (10-100mg) antibody production

Large Scale Recombinant Antibody Production Services

Large scale (100mg -1g) antibody production  
Super-scale (1-30g) antibody production

### Antibody Polishing Services

High Monomer Purity Antibody Production

Low Endotoxin and High Monomer Purity Antibody Production

### Antibody Engineering Services

Chimeric Antibody Engineering Services

Antibody Humanization Engineering Services

Antibody Affinity Maturation Engineering Services

### Recombinant antibody services

High-Throughput Recombinant Antibody Production Services

Mini scale (0.1-1 mg) antibody production  
Small scale (1-10 mg) antibody production  
Mid-scale (10-100mg) antibody production

Large Scale Recombinant Antibody Production Services

Large scale (100mg -1g) antibody production  
Super-scale (1-30g) antibody production

### Antibody Fragment Production Services

ScFv Antibody Fragment Production

Fab Antibody Production

### Other Antibody Production Related Services

Antibody Gene Synthesis

Antibody Gene Codon Optimization

Antibody Gene Cloning from Hybridoma Cells

## 2 Protein Production Services

### Experience & Capacity

Production and purification of >6000 protein bulks in house

>70 stirred-tank bioreactors, >30 purification systems

Most experienced protein expression and purification team

Produce over 1000 new proteins at bulk quantities per year

### Protein purification tags

His-tag  
Fc-Fusion  
GST-tag  
FLAG-tag  
Sumo-tag  
Myc-tag  
HA-tag

### Protein production technologies

stable CHO cell culture  
transient transfection (HEK293 & CHO)  
yeast cell fermentation  
insect cell culture (baculovirus expression)  
E. Coli fermentation, soluble expression

## 3 Molecular Biology Services

### Gene synthesis and mutagenesis

Cost-effective gene synthesis and mutagenesis services

High throughput codon optimization

Gene synthesis services combined with our protein expression services as a one-stop shop service provider

# Make Better Recombinant Protein

## Worldwide leader in protein development & manufacturing

### Manufacture in House

- All proteins are produced & quality controlled in house
- >1000 new protein at bulk quantity per year
- Predicted N Terminal, validated molecule mass
- Lyophilized from sterile solution except enzyme

### Quality Strict Quality Control

- >16 kinds of quality target
- High purity, low endotoxin level
- Bioactivity guaranteed
- Better stability to ensure repeated experiment

### Protein Production Services

- Provide service of customization
- Multiple protein expression platforms
- >70 stirred-tank bioreactors, >30 purification systems
- Most experienced protein expression and purification team

### Bulk in Stock

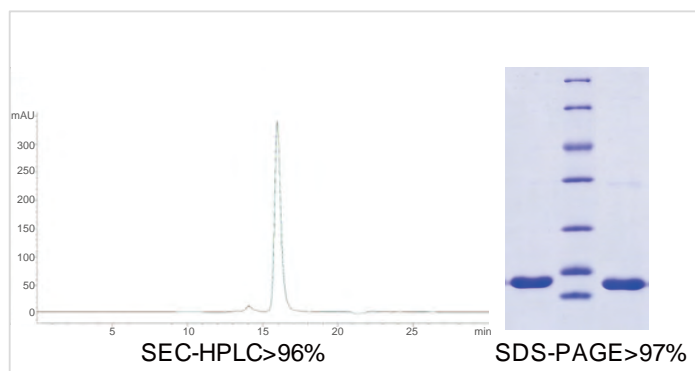

- All the protein are in bulk stock
- Bulk order will enjoy amazing discount

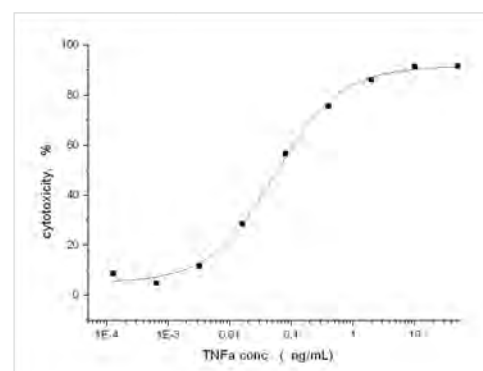

### Featured Recombinant Protein Reagent

- Cytokines, Growth factors
- Immune checkpoint, B7/CD28 family, Fc receptor
- Influenza antigen, Viral antigen
- CD molecule, Cancer Biomarker

## High purity

## High bioactivity

# How to order

## 1 Online order

Search products----add to cart----pay for the order---shipment within 24 hours---receive your products  
website: [www.sinobiological.com](http://www.sinobiological.com)

### Advantage of online order

Convenient: You can search products anytime, anywhere  
Save time: You can search quickly, order quickly, buy quickly

## 2 Offline order

Order email:  
[order@sinobiological.com](mailto:order@sinobiological.com)

Tel:  
+86-400-890-9989

## 3 Distributors

# Search introduction

## 1 Put Keyword in search bar, you'll get a product list.

Keyword type:

molecule

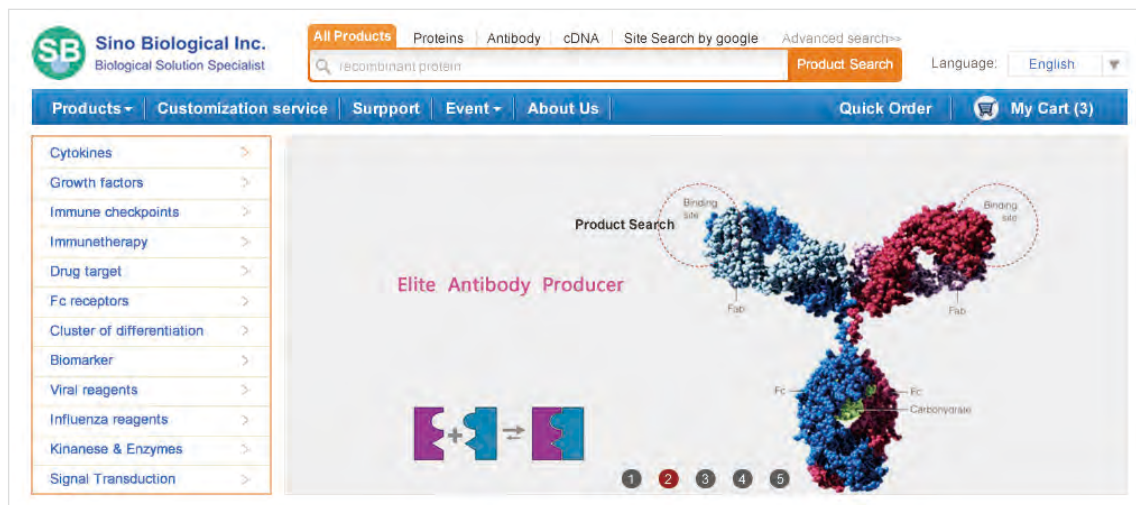

species + molecule

molecule + product category

catalogue number

any keywords related to products you want

If you enter the whole catalogue number, the detailed information page will show for you.

Here is the product list based on your inquiry  
Example of " FGF "

## 2 Narrow down result by these conditions:

Category

Molecules

Species

Applications

Other properties of product

## 3 Simplified information of products :

Click product name to see detail property

## 3 Get a customization list

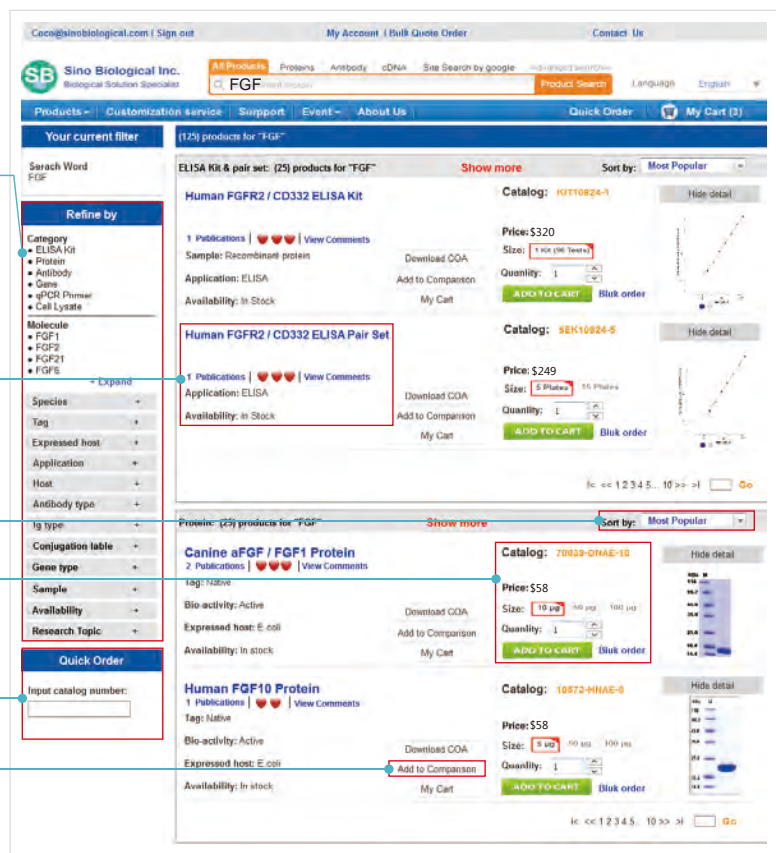

## 3 Package & price, you can:

add to cart

bulk order inquiry (big discount)

Quick order by adding catalogue number, save your time

## 4 Get a customization list

# Detailed information page of a product

**Human FSTL1 Protein (His Tag)** [Datasheet Download](#) [MSDS Download](#)

Submit Review | Submit Reference Leave a Message Add to favorite

**Navigation bar, you can find:**  
Properties of product  
Related product  
Protocol

**Order information:**  
Confirm size, quantity  
check out availability  
**Add to cart**

**Contact information:**  
If you have any question, please don't wait to ask us.

**Detailed information of product, you can see:**  
Basic information of this product  
Strict QC introduction  
Usage guide

**Human FSTL1 Protein Product Information**

Synonym: Fsp

Protein Construction: A DNA sequence encoding the human Fstl1 (NP\_077345.1) (Met1-Ile306) was expressed with a polyhistidine tag at the C-terminus.

Species: Human

Expressed Host: Human Cells

Shipping: In general, recombinant proteins are provided as lyophilized powder which are shipped at ambient temperature. Bulk packages of recombinant proteins are provided as frozen liquid. They are shipped out with blue ice unless customers require otherwise.

**Human Fstl1 Protein QC Testing**

Purity: > 90 % as determined by SDS-PAGE.

Endotoxin: < 1.0 EU per µg protein as determined by the LAL method.

Stability: Samples are stable for up to twelve months from date of receipt at -70°C.

Predicted N Terminus: Glu 19

Molecule Mass: The recombinant human Fstl1 consists 299 amino acids and predicts a molecular mass of 34 kDa.

Formulation: Lyophilized from sterile PBS, pH 7.4  
1. Normally 5 % - 8 % trehalose and mannitol are added as protectants before lyophilization. Specific concentrations are included in the hardcopy of COA.  
2. Please contact us for any concerns or special requirements.

**Human Fstl1 Protein Usage Guide**

Storage: Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution: A hardcopy of COA with reconstitution instruction is sent along with the products. Please refer to it for detailed information.

Expression host: Human Cells

**FSTL1 Background**

Follistatin-related protein 1 (FSTL1) is an extracellular glycoprotein whose functional significance in physiological and pathological processes is incompletely understood. Recently, we have shown that FSTL1 acts as a muscle-derived secreted factor that is up-regulated by Akt activation and ischemic stress and that FSTL1 exerts favorable actions on the heart and vasculature. Here, we sought to identify the receptor that mediates the cellular actions of FSTL1. It contains an FS module, a follistatin-like sequence containing 10 conserved cysteine residues. FSTL1 is thought to be an autoantigen associated with rheumatoid arthritis. DIP2A functions as a novel receptor that mediates the cardiovascular protective effects of FSTL1. Experiment results have provided in vivo and in vitro evidence to demonstrate that Fstl1 modulates lung development and alveolar maturation, in part, through BMP4 signaling.
